What is TurtleHacks?

TurtleHacks is a student-run hackathon and the first 36-hour green-centric hackathon targeting high-school students in the Greater Toronto Area (GTA). It aims to be an all-inclusive event to express students' creativity and come up with solutions to solve real-world problems. Through this event, we hope to prove that programming has no mould and that anyone who wants to explore this field has plenty of opportunities to do so! We intend to create an inclusive environment where students can access resources, workshops and mentors to maximize the impact on their learning. Sponsors make this entire vision possible and will be granted full opportunities to present APIs, provide mentors and market their brand.

Why Sponsor?

Being a high-school and student-run hackathon, sponsors will be able to form invaluable relationships with the programmers of the future. Many programmers get their first experiences in coding at hackathons, and your company will be able to make the first and a lasting impression on the resources and languages that a programmer uses going forward. Additionally, with the wealth of sponsorship benefits, this is an incredible opportunity to reach out and market to youth directly. TurtleHacks will provide a dedicated time frame to connecting. During of which, companies can set up a table and actively converse with diversely talented hackers who are actively seeking out new opportunities. We can assure you that we will provide plenty of opportunities to gain exposure and expand your consumer base through our hackathon.

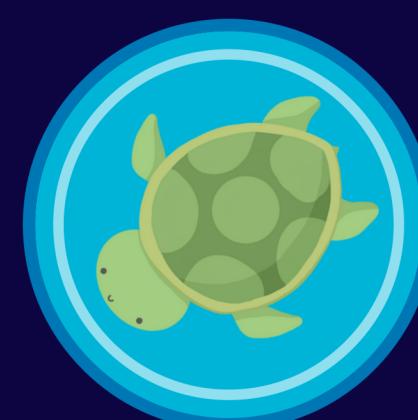

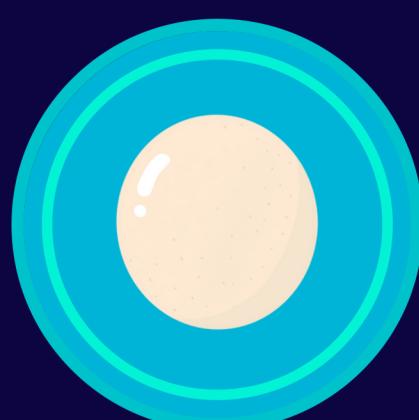

How You Can Help!

At its core, we are seeking financial assistance in order to run our event. Given that this is an in-person event, funds will be used for the venue, food, swag, and other logistics required to run a hackathon. Specifically, your company may help by:

- Providing funds directly to our organization, which will assure that all the needs necessary to make a hackathon possible are met.
- Sponsor a meal- given that this is a 36-hour hackathon, we will be serving a total of six meals as well as snacks available to coders throughout the event.
- Providing awards to winning teams which will encourage hackers to do their best.

We are open to negotiating and answering any concerns you may have. Please reach out to sponsor@turtlehacks.com.
